A DICTIONARY OF THE ENGLISH LANGUAGE,

Anſwering at once the Purpoſes of

RHYMING, SPELLING, AND PRONOUNCING.

On a PLAN not hitherto attempted.

IN WHICH,

I. The whole LANGUAGE is arranged according to its TERMINATIONS.
II. Every WORD is explained and divided into SYLLABLES exactly as pronounced.
III. WORDS liable to a DOUBLE PRONUNCIATION are fixed in their TRUE SOUND, by a Rhyme.
IV. Many Words of eſtabliſhed Uſage, not to be found in our beſt Dictionaries, are inſerted, and more technical Terms than in any Dictionary, except CHAMBERS's.

TO WHICH IS PREFIXED

A copious INTRODUCTION to the various Uſes of the Work, with critical and practical OBSERVATIONS on Orthography, Syllabication, Pronunciation, and Rhyme;

And for the Purpoſes of Poetry is added an INDEX of

ALLOWABLE RHYMES.

With Authorities for their Uſage from our beſt Authors.

DAVID GARRICK, Esq.

SIR,

THE ſame motives which induced me to ſolicit your patronage for the General Idea of a Pronouncing Dictionary, have determined me to prefix your name to the preſent work. If either have a ſufficient degree of merit to recommend them to the attention of the public, it is in a great meaſure owing to the early opportunities I have had of obſerving your pronunciation on the ſtage, and the frequent advice you have favoured me with in the proſecution of my enquiries. Without any apology, therefore, I preſent you with a production, which, if uſeful to the public, will be allowed to be properly addreſſed to you; and, if worthleſs, will at leaſt be a proof of your rea-

readineſs to encourage even the faintest endeavours in the ſervice of the muſes; a diſpoſition which will raiſe you a nobler monument with poſterity than that delicate diſtinction of character, that intenſely animated expreſſion, in which you excel as an actor, or that ſtrenuous perſeverance in the arduous duties of a manager, which has ſo largely contributed to the credit and improvement of the Engliſh ſtage.

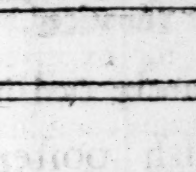

I am,

SIR,

with the utmoſt reſpect,

Your moſt obedient Servant,

J. WALKER.

INTRODUCTION.

AMONG the various attempts to facilitate the orthography and pronunciation of the Engliſh language, it is not a little ſurpriſing that the method here adopted ſhould have been either totally overlooked or neglected. A rhyming dictionary in a living language, for the purpoſes of poetry, ſeems no very unnatural or uſeleſs production, and imperfect ſketches of ſuch a work have already been given us by Poole and Byſhe; but no one has hitherto thought of making a dictionary of terminations ſubſervient to the art of ſpelling and pronouncing. The more obvious uſe of a work of this kind was perhaps an obſtacle to the completion of it, and its latent, though more uſeful qualities, were by this means unobſerved. A mere rhyming dictionary was looked on either as a bauble for ſchool-boys, or a reſource for poetaſters; and the nobler ends of pointing out the analogy of orthography and pronunciation, like many other advantages, were overlooked in the inſignificancy and puerility of the means.

Johnſon's Dictionary is ſcarcely more valuable for ſo nicely tracing the various and almoſt vaniſhing ſhades of the ſame word, than for furniſhing us with ſo copious a collection of nearly ſimilar words of a different form. Thoſe who underſtand the harmony of proſe, pay a cheerful tribute to Dr. Johnſon on this account, as he admits them to a more eaſy and extenſive view of the powers of the language, than can poſſibly be ſuggeſted by the memory alone; and by this means aſſiſts that delicacy of choice on which the preciſion and harmony of expreſſion ſo eſſentially depend. This advantage, which perhaps was not foreſeen by Dr. Johnſon himſelf, was no more than a neceſſary, though not an obvious, conſequence of ſo copious and perfect a diſtribution of the language into its conſtituent parts; and without the vanity of

pretending

pretending to a parallel, it may naturally be preſumed, that an arrangement, which is perfectly new, may poſſibly produce advantages which were entirely unnoticed before this arrangement was actually drawn out; for experience furniſhes us with a variety of inſtances of unexpected improvements ariſing from new, and perhaps fortuitous combinations, which were never ſuſpected by theoriſts, until a diſcovery had been made.

The Engliſh language, it may be ſaid, has hitherto been ſeen through but one end of the perſpective; and though terminations form the diſtinguiſhing character and ſpecific difference of every language in the world, we have never till now had a proſpect of our own in this point of view. Dr. Wallis has, with great penetration and ſagacity, ſhown the general import of initial conſonants; and with more appearance of truth than could have been conceived, has evinced, that words of a ſimilar ſignification, which are radically Engliſh, commence with nearly the ſame radical articulations. Mr. Elphinſton too has given us a very good idea of the general import of terminations by ſtrictures on the greateſt part of them; but none have yet thought it worth their while to give us a complete and alphabetical enumeration of the whole, by which alone we can have an adequate idea of every part. In this arrangement of the language, we eaſily diſcover its idiomatic ſtructure, and find its ſeveral parts fall into their proper claſſes, and almoſt every word as much diſtinguiſhed by its termination as its ſenſe. We at one glance perceive the peculiar vegetation of our own language, and the alteration foreign words undergo, by being tranſplanted into Engliſh ſoil. And thus by an acquaintance with the ſpecific character of every termination, we are the more readily led to aſſimilate foreign terms, by ſtamping them with the current impreſſion of our own.

ORTHOGRAPHY.

But an analogical inſight into the receſſes of formation, is not every advantage ariſing from this new and complete proſpect of it. Our orthography is not only an inſuperable difficulty

ficulty to foreigners, but an eternal ſource of diſpute and perplexity to ourſelves; and though it would be in vain to think of removing every intricacy that is conſtantly ariſing from indolence and caprice, yet that a conſiderable number may be remedied by a view of the general laws of formation, will be readily conceived by thoſe who enquire into the origin of the difficulties complained of. By an affectation of approximating to the orthography of the learned languages, we have rooted out many uſeful letters that ſprung up naturally with exotic words, and have been led to exclude all letters in our compounds which are not actually pronounced, though their exiſtence in theſe words is often no leſs neceſſary to prevent ambiguity than in the ſimples themſelves.

Thus the uſeful ſervile *e* is hardly ever ſuffered to have a place in compoſition, though from a feeling of its importance, we are almoſt intuitively tempted to let it remain in the branches, whenever we recollect it in the root. The omiſſion or inſertion of this letter occaſions a numerous catalogue of rules and exceptions. The other ſerviles *l*, *s*, &c. are no leſs abſurdly omitted in compoſition, though their power remains, and by this means both orthography and pronunciation are confounded. The duplication of conſonants, when an additional termination is aſſumed, forms another difficulty in our terminational orthography, as it may be called, which has embarraſſed the moſt correct and accurate writers. Now the only clew to extricate us from this labyrinth ſeems the method here adopted. An immediate view of the ſimilar formation of ſimilar parts of ſpeech, gives us a competent idea of the laws of terminational orthography, and enables us to detect the leaſt violation of them. Thus when in our beſt dictionaries I find *ſaleable*, *tameable*, and a few other words of the ſame form, retain the ſilent *e*, I conclude theſe are either ſlips of the pen, or errors of the preſs; for that the whole current of ſimilar endings, as *blamable*, *adorable*, *definable*, &c. omit the *e*, and that no reaſon appears for retaining it in the former, and not in the latter words.

But in order to detect the orthographical irregularities of our language, it will be neceſſary firſt to lay down ſuch general maxims in ſpelling as have almoſt univerſally taken place. By theſe we may judge of the impropriety of thoſe deviations, which are owing perhaps to a want of ſeeing the laws of formation as here exhibited, and knowing how far the irregularity extends.

ORTHOGRAPHICAL APHORISMS.

APHORISM I.

Monoſyllables ending with *f*, *l*, or *ſ*, preceded by a ſingle vowel, double the final conſonant; as *ſtaff*, *mill*, *paſs*, &c. *of*, *if*, *as*, *is*, *has*, *was*, *yes*, *us*, *thus*, are the only exceptions; and *add*, *butt*, *cann*, *ebb*, *egg*, *odd*, *err*, *buzz*, are the only words where other conſonants are doubled in the ſame ſituation.

APHORISM II.

Words ending with *y*, preceded by a conſonant, form the plurals of nouns, the perſons of verbs, verbal nouns, paſt participles, comparatives, and ſuperlatives, by changing *y* into *i*; as *ſpy*, *ſpies*, *I carry*, *thou carrieſt*, *he carrieth*, or *carries*, *carrier*, *carried*, *happy*, *happier*, *happieſt*; but the preſent participle in *ing* retains the *y*, that *i* may not be doubled, as *carrying*; *y* preceded by a vowel is never changed, as *boy*, *boys*, *I cloy*, *he cloys*, &c.

OBSERVATIONS.

By this rule we may perceive the impropriety of writing *flyer* for *flier*, and *defyer* for *defier*, and the ſtill greater impropriety of writing *fatner*, *oftner*, and *ſoftner*, for *fattener*, *oftener*, and *ſoftener*; though we meet with them in our beſt dictionaries; for the common terminations of verbs, verbal nouns, participles, &c. never occaſion any contraction in the radical word; *entrance* and *remembrance* pretend kindred with the French *entrant* and *remembrer*, and are therefore incorrigible; but *wondrous* ought to be written with the *e*, as well as *ſlanderous*, and if we write *dexterous*, why ſhould we ſee *ſiniſtrous*?

APHORISM III.

Words ending with the hiſſing conſonants *ch*, *ſ*, *ſh*, *x*, *z*, form the plural of nouns, by adding *es*, and the perſons of verbs by *eſt*, *eth*, or *es*, as *church*, *churches*, *I march*, *thou marcheſt*, *he marcheth*, or *marches*. Genitives of words ending in theſe conſonants are formed by adding *s* with an apoſtrophe; as *St. James's church*, the *church's ceremonies*.

APHORISM IV.

Words ending with any conſonant and ſilent *e*, form their plural, by adding *s* only; as a *place*, *places*, and perſons of verbs

verbs by adding *ſt*, *th*, or *s*; as *I place*, *thou placeſt*, *he placeth*, or *places*. Genitives of words ending with theſe letters are formed by adding *s* with an apoſtrophe; as the *place's pleaſantneſs*. Material adjectives in *y*, and comparatives in *iſh*, are formed from ſubſtantives of this termination by omitting the ſilent *e*, and annexing *y* or *iſh* to the conſonant, as *ropy*, *winy*, *ſlaviſh*, *ſwiniſh*, &c. from *rope*, *wine*, *ſlave*, *ſwine*, &c. The paſt participles, verbal nouns, and comparatives and ſuperlatives, add *d*, *r*, *r*, and *ſt*, to the ſimple; as *placed*, a *placer*, *wiſe*, *wiſer*, *wiſeſt*; but the preſent participle cuts off the *e*, and annexes *ing*, as *placing*. However, where the ſilent *e* is preceded by the ſoft *g*, the *e* muſt be preſerved, if the ſenſe of the word would otherwiſe be ambiguous; for we have no other means of diſtinguiſhing *ſingeing*, the participle of *to ſinge*, from *ſinging*, the participle of *to ſing*; *ſwingeing* from *ſwinging*, &c. as to *cringing*, *twinging*, &c. from *cringe*, *twinge*, &c. we truſt to the common power of the letters, as we have no verbs to *cring*, *twing*, &c. to occaſion any miſtake; for with reſpect to participles, and verbal nouns, a previous knowledge of the theme is ſuppoſed to be indiſpenſably neceſſary. See Aphoriſm X.

APHORISM V.

Words ending with a ſingle conſonant, preceded by a ſingle vowel, and with the accent on the laſt ſyllable, upon aſſuming an additional ſyllable, beginning with a vowel or *y*, double the conſonant, as *to abet*, *an abettor*; *to begin*, *a beginning*; *a fen*, *fenny*; *thin*, *thinniſh*, &c. but if a diphthong precede, or the accent be on the preceding ſyllable, the conſonant remains ſingle, as *to toil*, *toiling*, *to offer*, *an offering*, &c.

OBSERVATIONS.

By this rule, which is founded on an intention of aſcertaining the quantity of the accented vowel by doubling the conſonant, and which would be infinitely uſeful and agreeable to the analogy of the language, if extended univerſally, we perceive the impropriety of ſpelling the adventitious ſyllables of terminations with double letters, when the accent is not really upon them. Dr. Lowth has juſtly remarked, that this error frequently takes place in the words *worſhipping*, *counſelling*, &c. which having the accent on the firſt ſyllable, ought to be written *worſhiping*, *counſeling*, &c. An ignorance of this

rule has led many to write *bigotted* for *bigoted*, and from this ſpelling has frequently ariſen a falſe pronunciation; but no letter ſeems to be more frequently doubled improperly than *l*. Why we ſhould write *libelling*, *levelling*, *revelling*, and yet *offering*, *ſuffering*, *reaſoning*, I am totally at a loſs to determine; and unleſs *l* can give a better plea than any other letter in the alphabet for being doubled in this ſituation, I muſt, in the ſtyle of Lucian, in his trial of the letter *T*, declare for an expulſion.

APHORISM VI.

Words ending with *y*, preceded by a conſonant, upon aſſuming an additional ſyllable beginning with a conſonant, change *y* into *i*, as *happy*, *happily*, *happineſs*; but *y* preceded by a vowel is never changed, as *coy*, *coyly*, *gay*, *gayly*, &c.

OBSERVATIONS.

By attending to this rule we detect a number of typographical errors, from which even our beſt Dictionary is not free; ſuch as *ſlyly*, *dryly*, *dryneſs*, inſtead of *ſhily*, *drily*, *drineſs*. Warburton, in his edition of Pope, every where adheres to his analogy.

> Some *drily* plain, without invention's aid,
> Write dull receipts how poems may be made.
>
> *Eſſay on Crit.*

Though in the firſt edition of this eſſay publiſhed by Pope himſelf, we find this word written *dryly*. Why the *y* ſhould be thus converted into *i* is not eaſily conceived, unleſs it was feared we ſhould confound words of our own language with thoſe derived from the Greek; for with reſpect to the diſtinction of the plural number from the genitive caſe, as this does not prevent the ſimilitude when a vowel precedes, why ſhould we fear a miſtake between *fly* and *fly's*, any more than between *boy* and *boy's*? It is highly probable that the origin of this inſignificant and embarraſſing change of the *y* into *i*, aroſe from the taſte and ſagacity of Engliſh printers, who conſidered the *y* as bearing too little proportion to the number of the other letters, and made this weighty reaſon the foundation of the alteration. But this alteration once allowed by cuſtom, even a Baſkerville muſt ſubmit to it; and certainty being more the object of language than perfect propriety, it would

would be the laſt abſurdity, to deprive a rule which has nothing elſe to recommend it, of its only merit—uniformity.

APHORISM VII.

Words ending with any double letter but *l*, and taking *neſs*, *leſs*, *ly*, or *ful*, after them preſerve the letter double; as *harmleſſneſs*, *careleſſneſs*, *careleſsly*, *ſtiffneſs*, *ſtiffly*, *ſucceſsful*, *diſtreſsful*, &c. but thoſe words ending with double *l*, and taking *neſs*, *leſs*, *ly*, or *ful* after them, omit one *l*, as *fulneſs*, *ſkilleſs*, *fully*.

OBSERVATIONS.

Why one *l* ſhould be omitted when *leſs* or *ly* is aſſumed, may be eaſily conceived to ariſe from the uncouth appearance three letters of the ſame kind would have when meeting together; but why the analogy between theſe ſimples and compounds ſhould be deſtroyed when *neſs* or *ful* is aſſumed, is not eaſy to comprehend; why ſhould we not write *dullneſs*, *fullneſs*, *ſkillful* and *willful*, as well as *ſtiffneſs*, *gruffneſs*, *croſsly*, and *croſſneſs*? Nay, the propriety of this orthography makes it almoſt impoſſible to root it out entirely, and we find theſe four words, *illneſs*, *fellneſs*, *ſhrillneſs*, and *ſtillneſs*, left in our beſt dictionary with the double *l*, but a greater number of words of the ſame form having the ſingle *l*, as *ſmalneſs*, *talneſs*, *chilneſs*, *dulneſs*, *fulneſs*, and the long catalogue of words of this termination, as *wilfulneſs*, *bliſsfulneſs*, &c. ſufficiently ſhow to which orthography cuſtom has the greateſt partiality; and indeed as the rage for curtailing our language of double letters ſeems incurable, the diſeaſe will at leaſt be more tolerable if we determine its progreſs to ſome uniformity, and ſince there is no hope of reſtoring the loſt *l* to

Smalneſs
Talneſs
Chilneſs
Dulneſs
Fulneſs
And its numerous compounds.

} why ſhould we write

Illneſs
Fellneſs
Shrillneſs and
Stillneſs,

unleſs we are determined to have no rule for our orthography, good or bad? This rule likewiſe ſerves to correct ſeveral typographical errors in our beſt dictionary, as *careleſly*, *needleſly*, &c. for *careleſsly*, *needleſsly*, &c.

APHORISM VIII.

Neſs, *leſs*, *ly*, and *ful*, added to words ending with ſilent *e*, do not cut it off, as *paleneſs*, *guileleſs*, *cloſely*, *peaceful*, &c. except *e* is preceded by a vowel, and then it is omitted, as *duly*, *truly*, from *due* and *true*.

OBSERVATIONS.

But what ſhall we ſay then to *bluely*, *blueneſs*, *rueful*, &c. which, ſtrange as it may ſeem, would be more agreeably to the general current of orthography, written *bluly*, *bluneſs*, *ruful*, &c. the reaſons ſeem to be theſe, wherever the general laws of pronunciation in compounds ſupply the place of ſerviles in ſimple words, there the ſerviles are omitted; but *bluly*, *bluneſs*, *ruful*, &c. according to the common rule of pronouncing, would be as juſtly ſounded as *bluely*, *blueneſs*, *rueful*, &c. and at the ſame time would preclude the poſſible miſtake which might ariſe if the ſimples *blue* and *rue* were not underſtood to be the roots of the words in queſtion; for in this caſe *blueneſs* and *rueful* might be pronounced as if divided into *blu-e-neſs* and *ru-e-ful*; but as it is neceſſary the ſpelling ſhould convey the ſound of the compound without ſuppoſing a previous knowledge of the ſimples, and without being liable to a double pronunciation, the omiſſion of *e* in *bluly* and *bluneſs*, as well as in *duly* and *truly*, ſeems moſt analogical. See Aphoriſm X.

This rule ſerves to rectify ſeveral miſtakes of the preſs in our beſt dictionary.

Chaſtly,	for	*Chaſtely*.
Chaſtneſs,		*Chaſteneſs*.
Fertily,		*Fertilely*.
Genteely,		*Genteelly*.
Blithly,		*Blithely*.

Nor can *wholly*, though univerſally adopted, make us forget that it ought to be *wholely*.

APHO-

APHORISM IX.

Ment, added to words ending with ſilent *e*, preſerves the *e* from eliſion, as *abatement*, *incitement*, *chaſtiſement*, *judgement*, &c. but, like other terminations, changes the *y* into *i*, when preceded by a conſonant, as *accompaniment*.

APHORISM X.

Able and *ible*, when incorporated into words ending with ſilent *e*, almoſt always cut it off, as *blamable*, *curable*, *ſenſible*, but if *c* or *g* ſoft come before *e* in the original word, the *e* is then preſerved, as *changeable*, *peaceable*, &c.

OBSERVATIONS.

This exception is founded on the neceſſity of ſhewing that the preceding *c* and *g* in theſe words are ſoft, which might poſſibly be miſtaken, and pronounced hard, if written *changable*, *peacable*, &c. Another exception ſeems to take place in the compounds of *move* and *prove*, which are generally written *moveable*, *proveable*, &c. but on an inſpection into all the compounds of theſe words in Johnſon's Dictionary, we find the *e* ſo often omitted as to make it very doubtful whether theſe words are an exception to the general rule or not, for thus they ſtand.

The uncertainty of our orthography in this claſs of words may be preſumed to ariſe from a confuſed idea of the neceſſity of aſcertaining the ſound of the ſimple by inſerting the ſilent *e*, and the general cuſtom of omitting this letter when words are compounded with theſe terminations; and it will require ſome attention to diſcover to which of theſe modes

modes of ſpelling we ought to give the preference; however, till better reaſons are offered for a deciſion, let us ſuppoſe the following:

The firſt object of ſpelling compound words ſeems to be merely a conveyance of the ſound, without neceſſarily ſuppoſing a knowledge of the ſimples; that the elements of which the compound is formed, may be ſufficient of themſelves to ſuggeſt their ſound. The next object of ſpelling compounds ſeems to be an omiſſion of all ſerviles in the ſimples which were not actually ſounded, and whoſe uſe may be ſuppoſed to be ſuperſeded in the compounds by the general laws of Engliſh pronunciation, which, contrary to thoſe of the learned languages, ſuppoſe every accented vowel to be long and open, which is followed but by a ſingle conſonant. Thus the *e* in *deſirable* is omitted, becauſe the common rules of pronunciation indicate that the accent upon *i*, followed by a conſonant ſucceeded by a vowel, has neceſſarily the ſame ſound as in *deſire*. But when the radical letters have not their ordinary ſound in the ſimples, the firſt law of orthography takes place, and inſerts the ſervile *e* to ſuggeſt the ſound of the ſimple, when blended with the compound; for though we are frugal of our letters to a fault, yet when the ſound of any of the radical letters might be endangered by ſuch an omiſſion, we then find the *e* preſerved. Nor is a previous knowledge of the ſimple ſuppoſed to be a ſufficient ſecurity, as in *changeable*, *peaceable*, &c. From hence we may gather that every compound word is ſuppoſed to convey its own ſound agreeably to the common ſound of the letters, without the neceſſity of having recourſe to a knowledge of the ſimples from which it is formed, and therefore as the ſound of *o* in *move*, *prove*, &c. is not the general ſound of that letter, and conſequently if the *e* were not preſerved to ſuggeſt the ſimple, it might be liable to the ſound of *o* in *rove*, *grove*, *love*, or *ſhove*, we find it perfectly agreeable to the firſt general law of Engliſh orthography to retain the letter by which alone the ſound of the radical part of the word can be aſcertained; and therefore as we very juſtly write *moveable*, *proveable*, &c. ſo we ought to write *removeable*, *improveable*, &c. *Moving*, *proving*, &c. being affections of the verbs *move* and *prove*, neceſſarily ſuggeſt their ſimples, and make the inſertion of *e* unneceſſary. See Aphoriſm IV.

With

With reſpect to *reconcileable*, *unreconcileable*, and *reconcileableneſs*, which we find in Johnſon with the *e*, though *irreconcilable*, *irreconcilably*, and *irreconcilableneſs* are without it, we muſt claſs theſe with *ſaleable*, *tameable*, *unſhakeable*, *untameable*, and *ſizeable*, for as theſe are the only words of this form in the whole language where the ſilent *e* is preſerved, it is reaſonable to ſuppoſe that its inſertion here was owing either to the inadvertence of the author or printer; for as the preſervation of *e* in theſe words is founded on ſuch reaſons as would oblige us to preſerve the ſilent *e* in all compounds where it is now omitted, and conſequently entirely alter the current orthography, the omiſſion of it, wherever the preceding vowel or conſonant retains its general ſound, is certainly the moſt analogical; as there is no more reaſon for retaining the ſilent *e* in *ſaleable*, *tameable*, &c. than in *blamable*, *tunable*, *conſumable*, &c. *titheable* has a proper claim to the *e*, to ſhow that *th* has its flat or obtuſe ſound.

APHORISM XI.

The verbs to *lay*, *pay*, and *ſay*, by an unaccountable caprice, form their preterits and participles paſſive, by changing *y* into *i*, and omitting *e* in the aſſumed termination *ed*; and inſtead of *layed*, *payed*, *ſayed*, we always ſee *laid*, *paid*, *ſaid*, which orthography is preſerved in their compounds, as *unlaid*, *unſaid*, *repaid*. This is an exception to Aphoriſm II.

APHORISM XII.

Words taken into compoſition often drop thoſe letters which were ſuperfluous in their ſimples, as *Chriſtmas*, *dunghill*, *handful*, &c.

OBSERVATIONS.

The uncertainty of our orthography in this article calls loudly for reformation, and nothing can better ſhow the danger of indulging this exciſion, than a diſplay of the diverſity that reigns in our only dictionary, as Johnſon's, without a figure, may be called.

Watermill	*Downhil*	*Tipſtaff*	*Waterfal*
Windmill	*Dunghil*	*Scurvygraſs*	*Twibil*

The origin of this ridiculous irregularity which has prevailed within theſe few years, is not hard to gueſs. Some ſhallow writers, or perhaps printers, have heard that good authors have complained that our language is clogged by cluſters of conſonants. This was ſufficient to ſet theſe ſmatterers at work on ſo eaſy a buſineſs as that of unloading the language of its uſeleſs letters; and we find under the notion of uſeleſs letters, and cluſters of conſonants, we are near being deprived of the moſt uſeful letters we have. But words are evidently miſtaken for things. Cluſters of conſonants to the ear are very different from aſſemblages of conſonants to the eye; theſe are often no more than double conſonants of the ſame kind, and are ſounded as eaſily as ſingle ones; but thoſe knots of diſcordant conſonants to the ear, however diſguſtful, are not to be removed without entirely altering the language. The cluſters of conſonants of which Mr. Addiſon complains, are thoſe that ariſe from ſinking the intervening vowels in pronunciation, as *drown'd*, *walk'd*, *arriv'd*, for *drowned*, *walked*, *arrived*. The double letters at the end of words, which are ridiculouſly confounded with what is termed cluſters of conſonants, as to *inſtall*, *windfall*, *handfull*, &c. make not the leaſt alteration in the ſound of the words, and are often ſo eſſentially neceſſary to preſerve the true ſound from being miſtaken, that if we deprive words of one of theſe double letters, they are in danger of degenerating into a different ſound: for what ſecurity have we but a previous knowledge of the ſimples, which is contrary to the firſt principles of our orthography, that the laſt ſyllable of *waterfal* is not to rhyme with the firſt of *ſhal-low*, and the laſt of *handful* with the monoſyllable *dull?* In ſhort, as Mr. Elphinſton very juſtly, as well as pleaſantly, obſerves, "Every reader, both young "and old, muſt now be ſo ſagacious an analyſt as to diſcern "at once, not only what are compounds, and what their "ſimples,

" ſimples, but that *al* in compoſition is equal to *all* out of it; " or, in other words, that it is, both what it is, and what it " is not." Prin. Eng. Lang. vol. i. p. 60.

Thus have I ventured, with a trembling hand, to point out a few of the moſt glaring inconſiſtencies under which the orthography of our language labours, without daring to make the leaſt ſtep to a reformation myſelf: for if ever this be done to any good purpoſe, it muſt certainly be by the joint labour of both our univerſities; till when, no individual can do better ſervice to the orthography of his country than to let it remain as it ſtands at preſent in that monument of Engliſh philology erected by Johnſon. Thoſe who ſee beyond the ſurface, regret the many deviations from that only ſtandard of our language by the Greeklings and Latiniſters of this ſmattering age; and it is certainly to be feared, that if this pruning of our words of all the ſuperfluous letters, as they are called, ſhould be much farther indulged, we ſhall quickly antiquate our moſt reſpectable authors, and irreparably maim our language.

SYLLABICATION.

As the inverted order of arrangement gives us a conſiſtent idea of the ſtructure of the language, ſo a diviſion of words into ſyllables directs us in their ſound; for the diviſion here adopted, is not founded on any rules drawn from etymology, or the practice of languages eſſentially different from our own, but on ſuch principles as are the reſult of the language itſelf, and ariſe naturally from the very nature and practice of pronunciation. This part of language, which has been left to chance or caprice, is of all others the moſt important and delicate. Hardly any thing like a ſyſtem has been chalked out, or have any rules been given that have produced the leaſt uniformity, or anſwered any valuable purpoſes of pronunciation. 'Till Dr. Kenrick's Rhetorical Dictionary, we have ſcarcely ſeen any thing like an attempt to divide words as they are pronounced; but the Latin and Greek ſyllabication implicitly adopted, to the evident diſadvantage of children, and embarraſſment of foreigners; and for the very ſame reaſons that Ramus contends, we ought to divide *doctus* and *Atlas*, into *do-ctus* and *A-tlas*; Mr. Ward inſiſts we muſt ſeparate

 magnet,

magnet, *poplar*, *luſtre*, and *reptile*, into *ma-gnet*, *po-plar*, *lu-ſtre*, and *re-ptile*.

Now if the end of ſyllabication may be ſuppoſed to be the moſt likely method of directing us to the means, we ſhall find nothing can be more abſurd than ſuch a diviſion. For the object of parceling out a word into diſtinct portions, ſeems to be to inſtruct us either in its etymology or pronunciation. If in the diviſion of words into ſyllables we have only etymology in view, we muſt undoubtedly reſolve compounds into their ſimples, without paying the leaſt attention to the ſound of theſe ſimples, either as united, or in a ſtate of ſeparation. But though this method of ſyllabicating be very proper when we would inveſtigate the origin of a word and ſhew its derivation, yet when a diſtinctneſs of ſound is the only object of ſuch a diviſion, as is ever the caſe in the pronunciation of language, it would be the higheſt abſurdity to clog the inſtruction with etymological diviſions, as theſe are frequently oppoſite to actual pronunciation. Here then ſound alone ſhould be the criterion of ſyllabication, and we ought to reduce a compound word to its ſimple impulſes of the voice, as we would a bar of muſic to its ſimple notes; for etymologiſts may ſurely content themſelves with their own diviſions where ſound is not in queſtion, without diſturbing thoſe whoſe principal object is the conveying of ſound, and who conſider etymology as entirely independent on it.

Eaſy, however, as ſuch a diviſion may appear at firſt view, an attempt to extend it to every word in the language, will ſoon convince us that the ear in a thouſand inſtances will prove but a very uncertain guide, without a knowledge of thoſe principles by which the ear itſelf is inſenſibly directed, and which, having their origin in the nature of language, operate with ſteadineſs and regularity in the midſt of the fickleſt affectation and caprice. It can ſcarcely be ſuppoſed that the moſt experienced ſpeaker has heard every word in the language, and the whole circle of ſciences pronounced exactly as it ought to be; and if this be the caſe, he muſt ſometimes have recourſe to the principles of pronunciation when his ear is either uninformed or unfaithful. Theſe principles are thoſe general laws of articulation which determine the character, and fix the boundaries of every language; as in every ſyſtem of ſpeaking, however irregular, the organs muſt neceſſarily fall into ſome common mode

of

of enunciation, or the purpoſe of Providence in the gift of ſpeech would be abſolutely defeated. Theſe laws, like every other object of philoſophical enquiry, are only to be traced by an attentive obſervation and enumeration of particulars, and when theſe particulars are ſufficiently numerous to form a general rule, an axiom in pronunciation is acquired. By an accumulation of theſe axioms, and an analogical compariſon of them with each other, we diſcover the deviations of language where cuſtom has varied, and the only clew to guide us where cuſtom is either indeterminate or obſcure.

Thus by a view of the words ending in *ity* or *ety*, I find the accent invariably placed on the preceding ſyllable as in *diver'ſity*, *congru'ity*, &c. On a cloſer inſpection I find every vowel in this antepenultimate ſyllable, when no conſonant intervenes, pronounced long, as *de'ity*, *pi'ety*, &c. a nearer obſervation ſhows me that if a conſonant intervene, every vowel in this ſyllable but *u* contracts itſelf, and is pronounced ſhort, as *fever'ity*, *curioſ'ity*, *impu'nity*, &c. I find too, that even *u* contracts itſelf before two conſonants, as *cur'vity*, *tacitur'nity*, &c. and that *ſcarcity* and *rarity*, (for whoſe irregularity good reaſons may be given) are the only exceptions to this rule throughout the language. And thus we have a ſeries of near ſeven hundred words, the accentuation of which, as well as the quantity of the accented vowel, are reduced to two or three ſimple rules.

The ſame uniformity of accentuation and quantity, may be obſerved in the firſt ſyllable of thoſe words which have the accent on the third, as *dem-on-ſtra'tion*, *dim-i-nu'tion*, *lu-cu-bra'tion*, &c. where we evidently perceive a ſtreſs on the firſt ſyllable ſhortening every vowel but *u*, and this in every word throughout the language, except where two conſonants follow the *u* as in *cur-vi-lin'e-ar*, or where two vowels follow the conſonant that ſucceeds any other vowel in the firſt ſyllable, as *de-vi-a'tion*; or laſtly, where the word is not evidently of our own compoſition, as *re-con-vey'*; but as *u* in the firſt ſyllable of a word, having the accent on the third, has the ſame tendency to length and openneſs as was obſervable when it preceded the termination *ity*; I find it neceſſary to ſeparate it from the conſonant in *bu-ty-ra'ceous*, which I have never heard pronounced, as well as in *lu-cubra'tion*, which I have, and this from no pretended agreement with the quantity of the Latin words theſe are derived

from, for in the former word the *u* is doubtful; but from the general ſyſtem of quantity I ſee adopted in Engliſh pronunciation. This only will direct an Engliſh ear with certainty; for though we may ſometimes place the accent on words we borrow from the Greek or Latin on the ſame ſyllable as in thoſe languages, as *acu'men*, *elegi'ac*, &c. nay, though we ſometimes adopt the accent of the original with every word of the ſame termination we derive from it, as *aſſidu'ity*, *vi-du'ity*, &c. yet the quantity of the accented vowel is ſo often contrary to that of the Latin and Greek, that not a ſhadow of a rule can be drawn, in this point, from theſe languages to ours. Thus in the letter in queſtion, in the Latin *accumulo*, *dubius*, *tumor*, &c. the firſt *u* is every where ſhort; but in the Engliſh words *accumulate*, *dubious*, *tumour*, every where long. *Nuptialis*, *murmur*, *turbulentus*, &c. where the *u* in the firſt ſyllable in Latin is long, we as conſtantly pronounce it ſhort in *nuptial*, *murmur*, *turbulent*, &c. Nor indeed can we wonder that a different œconomy of quantity is obſervable in the ancient and modern languages, as in the former, two conſonants almoſt always lengthen the preceding vowel, and in the latter as conſtantly ſhorten it. Thus, without arguing in a vicious circle, we find that as a diviſion of the generality of words as they are actually pronounced, gives us the general laws of ſyllabication, ſo theſe laws once underſtood, direct us in the diviſion of ſuch words as we have never heard actually pronounced, and conſequently to the true pronunciation of them. For theſe operations, like cauſe and effect, reflect mutually a light on each other, and prove, that by nicely obſerving the path which cuſtom in language has once taken, we can more than gueſs at the line ſhe muſt keep in a ſimilar caſe, where her footſteps are not quite ſo diſcernible. So true is the obſervation of Scaliger: *Ita omnibus in rebus certiſſima ratione ſibi ipſa reſpondet natura.* De cauſis Ling. Lat.

PRONUNCIATION.

Syllabication having ſound for its object, and the aſſociation of ſimilar terminations contributing ſo largely to facilitate ſyllabication, it is evident that the moſt obvious advantage of this inverted proſpect of our language, is the aſſiſtance it affords to pronunciation. In other dictionaries, words of a totally

tally different form, promiſcuouſly ſucceed each other, while in this we find the words ſorted by their ſpecies as well as letters. It is recommended by Mr. Sheridan, in his Lectures on Elocution, to ſelect thoſe words which we find difficult to pronounce, and to repeat them frequently till a habit is acquired. This rule is founded on good ſenſe and experience, and ought to be carefully attended to by foreigners and provincials; but if the difficulty of pronouncing lies in the latter ſyllables, as is moſt frequently the caſe, what immenſe labour muſt it be to ſelect theſe from a common dictionary? But in this, how readily are we introduced to the whole ſpecies of any termination at once, and by ſeeing the whole claſs, gain an intimate acquaintance with its ſpecific orthography and pronunciation; for by this means, not only a more preciſe idea of the ſpelling of words is obtained, and an opportunity of habituating the organs to every difficult termination, but the dependance of accent on termination is at large diſplayed, and a habit induced of aſſociating the ſtreſs with its correſpondent ultimate ſyllable. This view of accent will ſhow us that our language is much leſs irregular than is generally imagined, and we ſoon diſcover termination to be, as it were, a rudder to accent, a key that opens to us an unexpected ſcene of uniformity, and proves, as Mr. Elphinſton admirably expreſſes it, "that ſpeech, the peculiar glory of "rational intercourſe, is neither given nor guided by an ar- "bitrary power, but that uſe in language, as in all nature, is "no other than the conſtant agency of harmony and of rea- "ſon." Prin. Eng. Lang. Vol. i. p. 3.

There are few but muſt obſerve with what difficulty children, and even youth, acquire a ſecure pronunciation of the technical terms in the learned profeſſions, and how frequently they are at a loſs for the ſound of an Engliſh word they have not been accuſtomed to, even at the time they are making great advances in the learned languages. This obſervation will naturally lead us to preſume that the preſent work, of all others, muſt be the moſt uſeful for ſuch ſchools as are not entirely negligent of their mother tongue. Here the words of any difficulty are ſelected in a moment, and by being repeated a few times over in the order they lie, will imbue the ear with ſuch an accentual rhythmus, if I may call it ſo, as will infallibly regulate the pronunciation ever after.

The

The diviſion and accentuation of words according to the length or ſhortneſs of the vowels, is an advantage to pronunciation which muſt ſtrike the moſt curſory inſpector. The utility of ſuch a method, if juſt and agreeable to the analogy of the language, will be readily acknowledged by thoſe who are ſo frequently diſappointed in the inſpection of other dictionaries. It is not a little ſurpriſing that a method of accentuation, ſo peculiarly uſeful, ſhould, till lately, have been almoſt entirely neglected. This defect in the generality of our dictionaries did not eſcape the judicious Mr. Sheridan, who inſiſts largely on the utility of placing the accent on the conſonant, when the preceding vowel is ſhort, and on the vowel, when the vowel itſelf is long; and though this does not ſpecify the kind of vowel, with reſpect to ſound, which is the ſubject of accentuation, it at leaſt determines its quantity, and is ſo far infinitely ſuperior to the common method of placing the accent on the vowel, whether it be long or ſhort.

Another and almoſt excluſive advantage of the preſent work is, that every monoſyllable which ſwerves from the general rule of pronunciation, is rhymed with ſuch a word as cannot poſſibly be pronounced otherwiſe than it is written; or if this cannot be done, it is ſpelled in ſuch a manner as to take away all ambiguity. Thus as the more general ſound of the diphthong *ea* is like *e* long and open in *here*, *mere*, &c. wherever it deviates from this ſound, a rhyme is inſerted to aſcertain its pronunciation; *head* therefore is rhymed with *bed*, that it may not be liable to the Scotch pronunciation of this word, as if ſpelled *heed*; and *great* is rhymed with *bate*, that it may be diſtinguiſhed from the ſound the Iriſh are apt to give it as if ſpelled *greet*. A *bow* (to ſhoot with) is rhymed with *go*, and *bow* (an act of reverence) with *cow*; and *prove*, *dove*, &c. are determined in their pronunciation by the univocal orthography *proove*, *duvv*, &c. by this means the ſtamina of our language, as monoſyllables may be called, are freed from ambiguity of ſound, and compounds rendered eaſier by fixing the pronunciation of their ſimples.

RHYME.

The laſt, and perhaps the leaſt, advantage of the following work, is the complete collection of all the rhymes in the language. However inſignificant it may ſeem in this reſpect, it

is at leaſt new. For though Byſhe has given us a Dictionary of Rhymes at the end of his Art of Poetry, his Dictionary, if it may be called ſo, does not contain ſix thouſand words, when Johnſon's Dictionary, to which this approaches nearer than any other, has very few ſhort of forty thouſand. Here then, as in the French *Dictionnaire des Rimes* of *Richelet*, the whole language is arranged according to its ſimilar endings, and the Engliſh are no longer unfurniſhed with an aſſiſtance to verſification, which Abbé du Bos tells us the French poets, *Quoi qu'ils en diſent ils ont tous ce livre dans leur arriere cabinet*. But had the author ſeen no farther advantage in this work than barely furniſhing ſimilar ſounds for the purpoſes of poetry, he ſhould have thought his labour ill beſtowed. It is by no means his intention to vindicate the cauſe of rhyme to the leaſt prejudice of a nobler verſe, which is the peculiar glory of the Engliſh as a living language; nor will he inſiſt on the proofs both from nature and experience, that rhyme may be ſometimes admitted to advantage, while Waller, Dryden, and Pope are in every body's hands *. It will only be neceſſary to obſerve, that for fear thoſe who have been accuſtomed to the common dictionary of rhymes annexed to Byſhe, ſhould find a difficulty in diſcovering words by this new arrangement, an Index of Rhymes, much more copious and correct than any hitherto publiſhed, is added, in which the old method of claſſing the words is continued, and a new and numerons claſs of allowable rhymes pointed out, with authorities for their uſage from our beſt poets; but for a more ſatisfactory account of this part of the work, ſee the Preface to the Index, at the end of this Dictionary.

* See the ſubject of rhyme judiciouſly diſcuſſed by Mr. Rice, in his Art of Reading.

From the attention paid to the preſs, I was in hopes to have pronounced this work abſolutely free from typographical errors; but though this was a vain expectation, I may, perhaps, boaſt that fewer miſtakes of the preſs have happened in the printing of this work, than in any other of the ſame ſize, equally liable to them. *Angelica* with a double *l*, inſtead of a ſingle one, and the omiſſion of *i* in *Bargainee*, are the only two which I recollect to be miſpelled; and the miſplacing of an accent or hyphen, though ſo difficult to avoid, is ſcarcely to be met with throughout the whole.

An IDEA of the ARRANGEMENT of WORDS in this DICTIONARY.

AS in other dictionaries words follow each other in an alphabetical order according to the letters they *begin* with, in this they follow each other according to the letters they *end* with. All words therefore that *end* with *a* are placed first in this Dictionary, as all those that *begin* with *a* are placed first in other dictionaries; those that *end* with *b* are placed next, and so of the rest. The directing letters at the top of each page, are likewise in the same order; that is, they are the last letters of words instead of the first.

DIRECTIONS FOR FINDING WORDS.

In looking for a word, the last letter is to be sought first, the last but one next, and so on from the last to the first letters of a word in an order, exactly contrary to that of other dictionaries. Thus if I want to find the word *Idea*, I must first look for *a*, among those words which end with *a*; these I find in the page opposite to this. The next letter I want is *e*, I therefore look among those words that end with *a*, for a word whose last letter but one is *e*, and find it in the word *Panacea*, the seventeenth word from the top; the next letter *d*, I look for among those words that end with *ea*, and find it in the word after *Panacea*, which is the word I sought. So that for the last letter of a word, I look among those words ending with the same letter, for the last letter but one of a word, I look among the last letters but one of these words, and so of the rest.

It must be particularly noted, that the directing letters on the top of each page are to be looked for in the same order, that is, from the right hand to the left.

The best way to avoid confusion, will be to look for the letters one by one, and to begin with the first word of every class, and so proceed downwards till the word is found. Thus if I want to find the word *Alphabet*, I keep the last letter *t* in my mind, and turn to that part of the dictionary where the words ending with *t* are classed, which is near the end. The first word of this class I find to be *at*; the next letter I want is *e*, I therefore run my eye down the last letter but one of this class till I come to *bet*, the next letter I want is *a*, which leads me to fix my eye upon the fourth letter from the last, which brings me to *abet*, and so of the rest.

As this arrangement is perfectly simple, two or three trials will render it as intelligible as the common order, especially if the word we look for be first written down, and carried along with the eye in its search.

PREFACE

TO THE

INDEX of PERFECT and ALLOWABLE RHYMES.

AS the principal object of the preceding ſyllabic Dictionary was to throw light on the ſtructure, orthography, and pronunciation of our language, it was neceſſary to adhere ſtrictly to the inverted order of arrangement, that terminations of ſimilar orthography might be claſſed together, though thoſe of ſimilar ſound would ſometimes by this means be ſeparated; but as the inverted poſition of the words, though the ſimpleſt that could be choſen for this purpoſe, may poſſibly at firſt embarraſs the inſpector for poetry, an index of rhymes is annexed in the ſame order as in Poole and Byſhe, though much more copious and correct, beſides a reference to an almoſt infinite number of allowable rhymes, with authorities for their uſage from our beſt poets.

As an index to allowable rhymes is an attempt perfectly new, it may not be improper to make a few obſervations with reſpect to its utility, and anſwer ſome objections to which it may be liable.

Obſ. 1. Whatever has been conſtantly practiſed by our moſt harmonious poets may be ſafely preſumed to be agreeable to the genius of our poetry; it is highly probable that our proſody has paſſed its meridian, and that no reformation can poſſibly be made without injuring it. The delicate ears of a Pope or an Addiſon, would ſcarcely have acquieſced in the uſage of imperfect rhymes, and ſanctified them ſo often by their practice, if ſuch rhymes had been really a blemiſh. The ſame maſculine force that ſupports our poetry without the aſſiſtance of any rhyme at all, ſeems to exempt it from that ſervile attention to perfectly ſimilar rhymes to which the French verſification is inviolably bound. Nay ſo far from a defect, that there ſeems to be ſometimes a beauty in departing from a perfect exactneſs of rhyme, as it agreeably breaks that ſameneſs of returning ſounds on the expecting ear, which in poetry, perhaps as in muſic, requires ſomething like an occaſional diſcord to make even harmony itſelf more agreeable.

Obſ. 2. But though an Engliſh ear will freely admit of a rhyme between a long and ſhort ſound of the ſame vowel, and ſometimes even between the long and ſhort ſounds of different vowels, yet theſe vowels that are ſuffered to rhyme are not of a different nature though called by a different name. The inaccuracy with which they are denominated has but very little influence on the practice of our poets, who trying them by the only infallible

infallible touchſtone, the ear, diſcover the relations between ſimilar vowels better than by a grammatical analyſis. By the uſage of the poets we find the vowels frequently aſſociated according to their radical ſound, and that an union is lawful between any vowels of the ſame family, as it may be called, though the name may be different, therefore as the *e* in *led*, is by no means the real ſhort ſound of that letter as heard in its name, or in the word *glede*, it is no wonder if the poets very often aſſociate it with the ſlender *a* as heard in *fade*, and of which it is really the ſhort ſound. The ſame may be obſerved of almoſt every other imperfect rhyme we meet with, if the family ſound of the vowel be preſerved, the ear acknowledges the affinity; if a vowel of a totally different ſound be aſſumed, the ear immediately detects the incongruous mixture.

Thus the different ſounds of the vowels *i*, *e*, *a*, *o*, *u*, ſlide into each other by an eaſy gradation, each of which is ſufficiently related to the preceding and ſucceeding ſound to form what is called an allowable rhyme. And though it muſt be confeſſed that poets have ſometimes abuſed the liberty of rhyming, and wounded the ear by an aſſociation of diſcordant vowels; yet this is no argument againſt the occaſional uſe of ſuch rhymes as are but gentle inflexions of the ſame radical ſound, as theſe circulate freely through our beſt compoſitions, and actually form a part of our proſody.

Obſ. 3. It will be neceſſary therefore to obſerve, that although authorities are not brought for the uſage of every individual allowable rhyme, the ſpecies of theſe rhymes, if I may call them ſo, are amply and repeatedly illuſtrated. For the ſame ear which allows *glaſs* to rhyme with *place*, or *place* with *peace* and *diſtreſs*, will permit *decay'd* to rhyme with *fled*, and *ſhade* with *mead*; for the conſonants with which they terminate do not alter the nature of the preceding vowels, or occaſion any diverſity in the quality of the rhyme. It would therefore have been ſufficient to have adduced a much ſmaller number of poetical examples than are here given; as they are all founded on the ſame principles, and muſt neceſſarily ſtand or fall together.

It may perhaps be objected that a work of this kind contributes to extend poetic blemiſhes, by furniſhing imperfect materials and apologies for uſing them. But it may be anſwered, that if theſe imperfect rhymes were allowed to be blemiſhes, it would ſtill be better to tolerate them, than cramp the imagination by the too narrow boundaries of exactly ſimilar ſounds. A want of perfect rhyme, if a real imperfection, is fully compenſated by gaining acceſs to a more eligible turn of thought; the moſt exact and harmonious rhyme would be dearly purchaſed

chaſed at the expence of the moſt delicate abatement in the ſtrength or beauty of an expreſſion. And as Byſhe ſuppoſes that the difficulty of finding rhymes has been the cauſe that ſuch indifferent ones have been frequently choſen, ſo it may with as much reaſon be preſumed, that the want of recollecting the licenſes of our beſt writers, and how agreeable they occaſionally are to the nature of our poetry, has often been the cauſe either of chooſing a weak expreſſion for the ſake of perfect rhyme, or of relinquiſhing a valuable one for no other reaſon than the want of it.

DIRECTIONS for finding RHYMES in the INDEX.

The ſimpleſt idea of the rhymes in this arrangement is, that the words are divided into five claſſes according to the vowel in their terminations: the firſt vowel in the laſt ſyllable of every word is firſt to be ſought for, and every other ſubſequent letter in its natural order, that is from the left hand to the right. Thus if I want a rhyme to *hand*, I look in the firſt claſs of vowels *a*, the next letter is *n*, which obliges me to proceed till I come to *ban*, *bran*, &c. the next letter is *d*, which I find after *ANCH*, and before I come to *ANE*. If I want a rhyme to *command*, *a* is the firſt vowel in the laſt ſyllable, and I proceed therefore as in *hand*, and ſo of every other; but as every arrangement of words but the natural is attended with difficulty, I ſhall endeavour to make the rule for finding rhymes as plain as poſſible, by adopting the directions of Byſhe, omitting that only which relates to the letter *y*, as cuſtom has entirely excluded the termination *ie* in the words *defy*, *rely*, &c. which in his time were frequently written *defie*, *relie*, &c.

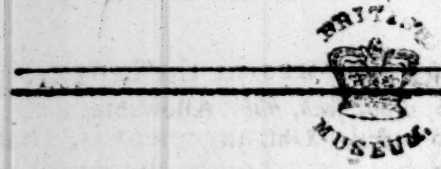

1. In looking for a word conſider the five vowels *A*, *E*, *I*, *O*, *U*, and begin at the vowel that precedes the laſt conſonant of the word; for example, to find *perſuade* and the words that rhyme to it, *D* is the laſt conſonant, *A* the vowel that precedes it, look for *ADE* and you will find *made*, *fade*, *invade*, and all the other words of that rhyme.

2. In like manner, if a word end in two or more conſonants, begin at the vowel that immediately preceds the firſt of them; for example *land*, *N* is the firſt of the final conſonants, *A* the vowel that precedes it, ſee *AND* and you will find *band*, *ſtand*, *command*, &c.

3. But if a diphthong, that is to ſay two or more vowels together, precedes the laſt conſonant or conſonants of a word, begin at the firſt of theſe two vowels; thus, to find the rhymes to *diſdain*, look not for *IN* but for *AIN*, and you will find *brain*, *chain*, *gain*, &c.

4. To find a word that ends in a diphthong preceded by a conſonant, begin only at the firſt vowel of the diphthong; for example, to find the rhymes to *ſubdue*, look for *UE*, and you will find *clue*, *due*, *enſue*, &c.

5. All the words that end in a ſingle vowel preceded by a conſonant are found by looking for that vowel only, except always the words that end in mute *E*, which are conſtantly found by the ſame method that has been already preſcribed for finding the rhymes to *perſuade*, whoſe final *E* is ſilent, and ſerves only to lengthen the ſound of the *A* in the laſt ſyllable.

ADVERTISEMENT.

CARE has been taken in the compiling of this Index to claſs rhymes together with the moſt ſcrupulous preciſion. Such as are called perfect rhymes are exactly ſimilar, thoſe that differ by nicer ſhades are called nearly perfect, and the reſt allowable only. So that this collection of words is in ſome meaſure a dictionary of pronunciation, and may anſwer very uſeful purpoſes to foreigners and provincials, who by underſtanding the ſound of one word may become acquainted with the pronunciation of a whole claſs, and at the ſame time avoid being miſled by the licences of poets in their frequent uſage of the looſer and leſs perfect rhymes.

No notice need be taken of the advantages ariſing from inſtances being given of plurals and participles, as *lays*, *days*, *obey'd*, *play'd*, &c. as this will immediately appear upon inſpection, which, with many other improvements, renders this Index of Rhymes, entirely independent on its connexion with the Pronouncing Dictionary, greatly ſuperior to every other work of the kind in our language.

Y, See IE.

I have purpoſely omitted many licenſes I might have produced, as judging them in reality too licentious. Among theſe, however, I do not reckon this of Sternhold and Hopkins, of Gothic memory:

And how he did commit their fruits
  Unto the *caterpillar*,
And eke the labour of their hands
  He gave to the *graſshopper*.

Theſe reverend verſifiers of the Pſalms, who for centuries have been the conſtant butt of criticiſm, are now fallen below it. The rhymes I have paſt by are ſuch as belong to more reſpectable names.

With kind embraces ſuch as *I*
Twiſt about my loving *ſhe*. Oldham.
Draw next the patron of that *tree*,
Draw Bacchus and ſoft Cupid *by*. Oldham.

My

INDEX.

My parents are propitious to my *wiſh*,
And ſhe herſelf conſenting to the *bliſs*. Dryden.

One ſees her thighs transform'd, another *views*
Her arms ſhoot out and branching into *boughs*. Addiſon.

Wit kindl'd by the ſulph'rous breath of *vice*,
Like the blue light'ning while it ſhines *deſtroys*. Pope.

But notwithſtanding theſe and ſome other vices of the ſame kind which ſome of our moſt reſpectable poets have inadvertently fallen into, there are few inſpectors into this Index, but muſt obſerve an obvious analogy between the vowels in the generality of the inſtances produced; and that however uncoothly they may ſound when pronounced alone, they give no diſguſt to an Engliſh ear, when introduced at proper intervals; but it is not ſo much my intention to apologize for the uſe of theſe imperfect rhymes, as to ſhew how they are uſed, and upon what authority. It is certain they may be uſed too frequently, and that they are far from being all equally agreeable to the ear. In ſhort, the ſame taſte and delicacy are neceſſary in this, as in the more eſſential part of poetry; beauties and blemiſhes differ but by nice ſhades, and it is the maſter alone who can diſcern that point where boldneſs degenerates into harſhneſs, and correctneſs into frigidity.
